

Toy Gift Ideas

From a Speech-Language Pathologist

Tip #1 Rotate Toys

Offer your child a set of their toys at a time. This practice benefits your child and parents too! Check out benefits as well as tips of how to begin this practice in your home [here](#).

Tip #2 Less Can Be More

Doing something over and over again may seem boring, but helps us do something *better!*

Tip #3 It's *How* You Play

Think of how you can use existing (or "old") toys in a new way. This can reuse toys by fostering new skills without spending more money.

Ages 2-3

- Stacking cups
- Bubbles
- Plastic cutting food
- Farm and animals

Ages 4-6

- Colouring or art supplies
- Lego (open-ended)
- House and people
